

Behaviour change can be difficult to achieve. In this workshop we will help you to Achieve Behaviour Change by applying tried and tested theories from Psychology.

Achieving Behaviour Change for patient safety

A one-day workshop

Friday 10th November 2017

10:00am – 16:30pm (registration from 9:15am)

Principal Hayley York Hotel,
Station Road, YO24 1AA

For further details click [here](#)

PROGRAMME

- Behaviour change theory
- Quality & safety improvement
- Identifying & addressing barriers to behaviour change
- Case studies in applying behaviour change to patient safety priorities
- Lunch and refreshments will be provided

OVERVIEW

This unique one day workshop developed by the Yorkshire Quality and Safety Research Group provides an opportunity to learn from leading researchers in behaviour change. Interactive learning and discussion will lead to improved understanding and enhanced practice in improving patient safety through behaviour change.

The event will be delivered by:

Professor Rebecca Lawton, Professor of Psychology University of Leeds & Bradford
Institute for Health Research

Dr Judith Dyson, Senior Lecturer
Faculty of Health Sciences, University Of Hull

Dr Ali Cracknell
Consultant in Medicine for Older People
Leeds Teaching Hospitals NHS Trust

LEARNING OUTCOMES

- An enhanced understanding of behaviour change theory
- Knowledge to design an intervention to support behaviour change
- Familiarity with a “behaviour change toolkit” to support your own behaviour change projects

To book your place please contact:
