The event will be delivered by:

Professor Gwyn Bevan, Professor of Policy Analysis
London School of Economics and Political Science

Greg Fell, Public Health Consultant
Bradford Metropolitan District Council

Who is this Masterclass for?
- NHS frontline clinicians, medical directors
- NHS finance managers, finance directors
- Senior commissioners
- Senior managers from within trusts
- Independent sector providers
- Academic sector
- Commissioning Support Unit

LEARNING OUTCOMES
- Understanding of alternative means of assessing value for money.
- To be able to appraise cost effectiveness studies.
- Knowledge of tools that are readily available for use with day to day information sources, and don’t rely on vast reams of complex data or specific expertise.

OVERVIEW

This Masterclass on Value in Healthcare will explore a number of contemporary methods that can readily be applied to any system to improve the value that is achieved.

Prof Gwyn Bevan has led a team at the London School of Economics in the development of a decision support tool namely STAR (the ‘socio-technical allocation of resources’) which helps healthcare priority setting with local stakeholders.

The session will introduce STAR, in how this was developed to build on Cost-Effectiveness Analysis, measures of the Burden of Disease, and Programme Budgeting and Marginal Analysis. STAR is designed to enable commissioners to focus on where their decisions are going to make a real difference for their population. It is moving from development to application and its potential will be shown by case studies.

This half day workshop will focus on demystifying some of the core concepts and the application of these tools in day to day settings.
