

# Hospital Mortality Statistics Masterclass

Aimed at clinical teams and non-executive directors involved in mortality governance and learning from deaths

Wednesday 19<sup>th</sup> January 2022, 13:00 – 16:30

Virtual workshop delivered via Zoom

This workshop will help you understand what you can and cannot learn from hospital mortality statistics. You will learn how they are derived and (ab)used. You will learn how best to report mortality statistics and understand how to investigate a high/low hospital mortality statistic.

## 13:00 Welcome and introduction

13:15 Understanding hospital mortality statistics

Key issues with hospital mortality statistics

How to report mortality statistics

14:30 Break

14:45 How to investigate hospital mortality rates

Group Discussions

16:30 Evaluation and close

Funded places are available for staff working in Yorkshire and Humber NHS organisations. A cancellation charge of £75 will apply if less than 24 hours' notice is given.

Delivered virtually in one 3.5 hour session by statistician and improvement expert:

### Professor Mohammed A Mohammed

*Professor of Healthcare, Quality & Effectiveness, University of Bradford*

Professor Mohammed has extensive experience in health care quality and is a leading expert in the science of improvement including statistical process control methods. He has also published a number of key papers on the use and abuse of statistics. Professor Mohammed is an Academic Advisor to the Improvement Academy.

Previous masterclass attendees described this using the following words:

Enjoyable  
Valuable  
Thoughtprovoking  
Useful  
Fascinating  
Stimulating  
Practical  
Interesting  
Fun  
Challenging  
Inspiring

Places are limited on the course and will be reserved on a first come first served basis.
